Faculty of Theoretical and Applied Economics

Bucharest University of Economic Studies

Invites you to participate at the

Economic Convergence in European Union *Paradigm shifts towards the green economy era*

(ECEU) – 19th edition

Bucharest, 7-8th of April 2022

We are pleased to invite you to the **19th International Conference on Economic Convergence in European Union, “Paradigm shifts towards the green economy”** which will **take place online between 7-8th of April 2022.**

Organized by **The Faculty of Theoretical and Applied Economics**, the *ECEU conference* is a multidisciplinary forum that promotes interaction and knowledge exchange among scholars from diverse research fields.

This year the main topic of the conference revolves around potential economic, social, or technological shifts caused by the transition to green economy. The zero-carbon emissions agenda emerges as a vital target that the world economy needs to reach, but, at the same time, some short- and medium-term economic disruptions might seem ineluctable. In addition, the current anxiety caused by the surge of energy prices prompts a closer relationship between the standard of living and limited resources reminding us of conveniently forgotten times of shortages and restrictive consumption. Present circumstances provide solid arguments that, while the renewable resources are not yet reliable and available on a wider scale, the energy market further relies on fossil fuels, prone to environmental disruptions and sensitive to geopolitical frictions. Against this background, the need for significant shifts in public policies and constant investments in renewable resources become ever more urgent. For instance, policymakers should be concerned with redesigning energy markets in terms of organizing an efficient storing process that might alleviate potential energy crises. In this context, the main goal of the 19th International Conference on Economic Convergence in the European Union is to provide a platform for research and discussions on topics that are centered on the potential paradigm shifts caused by the transition towards the green economy.

Participants will submit the abstract via email to simpozioaneconomie@economie.ase.ro no later than 3rd of March 2022.

Full papers as well as short papers (abstracts or drafts of research in progress you would like to share) are accepted.

Submitted papers will be peer reviewed in terms of novelty, originality, relevance, scientific soundness, methodological design, results, and contribution. It is ECEU policy to make efforts to send complete papers to two reviewers for full blind peer review. Submitted papers must not have been previously published or currently submitted for publication elsewhere.

Selected papers will be published in a Special issue of Theoretical and Applied Economics Journal, indexed in EconLit, RePec, DOAJ, EBSCO and ICAAP.

Important dates:

Abstract deadline: 3rd of March 2022

Notification of acceptance: 14th of March 2022

Full paper and participation fee: 1st of April 2022

Fees: *There is a participation fee of 50 Euro (250 lei) per paper, which also covers the publishing fees. For any extra papers or co-authors, you will not be charged with additional fees.*

The fee will be paid in the account: **Asociația Studenților în Economie, Afaceri și Comunicare, cont RO18INGB0000999911402937**

Organizers: Associate prof. PhD. Grigore Piroșcă, Dean of the Faculty of Theoretical and Applied Economics at Bucharest University of Economic Studies,
Associate prof. PhD. Silvia Elena Iacob, Vice-Dean of the Faculty of Theoretical and Applied Economics at Bucharest University of Economic Studies
Associate prof. PhD. Nicolae Moroianu, Vice-Dean of the Faculty of Theoretical and Applied Economics at Bucharest University of Economic Studies
